## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1, 12, 13, 14, 15, 16, 17, 20, 22, 25, 26, 27, 28, 29, 30, 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Resnick (US 6,701,925).

5. As to claims 1, 12, 13, 14, 15, 16, 17, 20, 22, 25, 26, 27, 28, 29, 30, and 31, Resnick teaches a protective breathing hood **10** comprising a hood made of stretchable fire resistant material and which is also impermeable to gases and biologic material, said hood sized and shaped for placing over a head of a user in an airtight manner with an opening of the hood sealingly engaging a neck portion of the user; at least a visor portion **30** of the hood is transparent; and a pair of respiratory unit **50a, 50b** comprising a housing formed with an inhalation flow path and an exhalation flow path fitted with one way exhaling valve **70**, and wherein in a donned position of the hood a chamber is formed at a mouth/nose location thereof. It should be noted that Resnick teaches essentially all of the limitations except for wherein the inhalation flow path has activated charcoal particles. However, the use of activated charcoal particles to filter air is well known in the filter and respiratory art (**See Cols. 2-4**).

#### ***Allowable Subject Matter***

6. Claims 2-11, 18, 19, 21, 23, and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
